SUMMARY

Founding engineer who takes ideas from blank repo to live, monetized product solo — 8+ shipped products with real users, live domains, and payment integrations: a multi-tenant SAP copilot SaaS, a two-sided SaaS affiliate marketplace, a GST compliance suite for CAs, a consumer AI agent, and a desktop OS operator with a 3-tier paid plan. Full-stack, full-scope: architecture, backend, frontend, payments, security, distribution, and the business model.

TECHNICAL SKILLS

- 0→1 Execution: architecture decisions · MVP scoping · solo full-stack builds (2–31k LOC products) · shipping cadence (8+ products shipped) · post-launch iteration
- Stack: Next.js 14–16 · React 19 · TypeScript · FastAPI (Python) · Go · Rust (Tauri 2) · Supabase/PostgreSQL · Firebase · Redis · Docker
- Monetization: Razorpay (UPI, subscriptions, deposits, payouts) · Stripe · PayPal · prepaid credit wallets · freemium + BYOK tiers · 3-tier SaaS pricing (\$14.99/\$49.99) · platform-fee marketplaces (2–5%)
- Growth: viral share loops (edge OG images) · Chrome extension distribution · one-line installers · SEO/landing pages · 95+ Lighthouse
- Ops: Vercel/Render/Firebase deploys · GitHub Actions CI + keep-alives · RLS & security hardening · audit logging

EXPERIENCE

Cinntra Infotech — Systems Engineer · 2026 – Present

- Built CIRA, a RAG agent translating natural-language requests into audited SAP HANA queries and write operations, giving non-technical users direct access to enterprise data
- Built the point-of-sale system backend: transaction recording, merchant reconciliation, and offline synchronization

Niswa Engineering — Technical Consultant & Automation Engineer · 2024 – 2026

- Built asynchronous AI agents (TypeScript) that automated 80%+ of a content generation and scheduling pipeline
- Built the company website in Astro (95+ Google Lighthouse score); set up cloud infrastructure, API integrations, and event-driven automation workflows

Sudarshana Foundation — Full-Stack & Automation Engineer · Contract

- Designed and built the organization's first centralized web platform, digitizing paper-based workflows into software
- Built database systems handling 5,000+ monthly transactions

SELECTED SHIPPED PRODUCTS

MYLO OS — Desktop AI Operator (product + pricing + edge infra)

- Took a "Jarvis-like desktop agent" from concept to product: Tauri 2 + Rust app (ghost cursor, screen understanding, background headless-Chrome agents), marketing site (mylo-frontend.vercel.app), Cloudflare edge proxy for managed tiers (license validation + server-side key injection), and a 3-tier monetization model (BYOK Free / \$14.99 Pro / \$49.99 Elite) with model gating and token budgets — including privacy policy, ToS, and support surfaces.
- Tech: Rust, Tauri 2, Cloudflare Workers, Next.js — github.com/Aryan-Protein-Vala/MyloOS

Black Index — Two-Sided SaaS Affiliate Marketplace (31k+ LOC)

- Built the complete platform solo: founder listings with hybrid commissions (upfront + recurring %), seller ("Warlord") referral links and earnings dashboards, attribution tracking, and the settlement engine (14 payment-provider webhooks → atomic conversion RPC → 30-day escrow → RazorpayX/UPI payouts) — plus fraud controls (self-referral, velocity, disputes) and an admin console.
- Tech: Next.js, Supabase, Razorpay/Stripe — github.com/Aryan-Protein-Vala/Black-Index

B1 Copilot — Multi-Tenant SAP Copilot SaaS

- Took an enterprise AI copilot to SaaS shape: white-label theming, 3-tier RBAC (Super Admin → Partner → Client), tiered plans (Pilot/Read-Only/Read-Write/Migration), per-tenant quotas, partner data-migration tool, and a 60-question E2E accuracy harness as the quality bar — the product a reseller can resell.
- Tech: FastAPI, Next.js 16, SAP HANA, Docker — github.com/Aryan-Protein-Vala/Cira-RAG-agent

GSTGenius — GST Compliance Suite for Indian CAs (live)

- Shipped a full business vertical product: GST-compliant invoicing (HSN-driven CGST/SGST/IGST), GSTR-1/3B reporting, recurring billing with WhatsApp/email dunning, gateway auto-reconciliation, and a CA portal managing unlimited clients — live at gstgenius-6f0d0.web.app with Razorpay/UPI billing.
- Tech: Next.js 15, Firebase, Razorpay — github.com/Aryan-Protein-Vala/GSTGenius

PlusOne — Verified Social Marketplace (live)

- Shipped a consumer two-sided product end to end: discovery, plan hosting with █ rates, trust-score verification, real-time chat on booking, safety moderation — edge-hosted in Mumbai; live at findyour-plusone.vercel.app.
- Tech: Next.js 15, Supabase — github.com/Aryan-Protein-Vala/PlusOne

Prometheus — Distributed Desktop Tool (live)

- Built product + distribution + business: 100%-offline Rust TUI cleaner, one-line curl installer, HWID licensing, enterprise fleet console, ad-revenue surface, and product site — live at prometheus-cleaner.vercel.app.
- Tech: Rust, TUI, Next.js — github.com/Aryan-Protein-Vala/Prometheus

CERTIFICATIONS

- Frontend Development Certification — Sheryians Coding School
- Data Science & AI/ML Bootcamp Certification — Udemy
